

## 2024 RENEWABLE ENERGY HIGHLIGHTS

We are pleased to share some impressive milestones from our 2024 renewable energy projects at ESE. Over the past year, our dedicated team has achieved remarkable success, including the completion of Environmental Site Assessments and Critical Issue Analyses. Additionally, we conducted Wetland Studies, Biological Resource Evaluations, and Cultural Resource Studies. Our efforts spanned over 20 states, contributing to more than 18 gigawatts of projects. These achievements underscore our commitment to advancing sustainable energy solutions and our continued growth in the renewable energy sector.

### BY THE NUMBERS

- 85 Environmental Site Assessments
- 33 Critical Issue Analysis with Permit Matrix
- 29 Wetland Delineations
- 19 Biological Resource Evaluations
- 16 Cultural Resource Surveys

Taking part in  
over **18 GW**  
of projects
